## TX-D30 Scrubber Machine

### 1. Technical Parameter:

| Description               | Specification | Unit              |
|---------------------------|---------------|-------------------|
| Voltage                   | 24            | V                 |
| Brush Disc Motor Power    | 500           | W                 |
| Suction Baffle Width      | 790           | mm                |
| Brush Diameter            | 530           | mm                |
| Clean Water Tank Capacity | 60            | L                 |
| Sewage Tank capacity      | 60            | L                 |
| Cleaning Efficiency       | 2500          | m <sup>2</sup> /h |
| Working Hours             | 4-5           | H                 |
| Brush Disc Pressure       | 37            | KG                |
| Total Size                | 1270*550*1090 | mm                |
| Total Weight              | 154           | KG                |

## TX-D30 Scrubber Machine

### 2. Product Features:

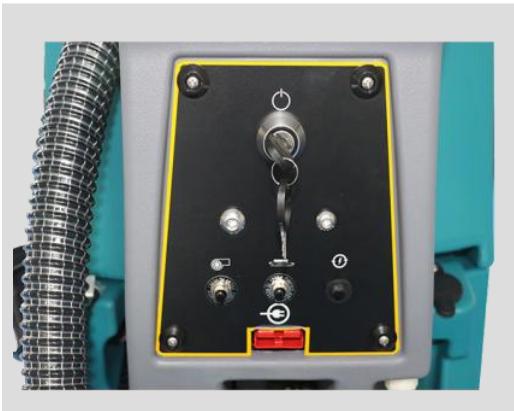

1

Floating brush disc design, self sensing should adjust the pressure of brush disc to the ground, so as to clean more thoroughly. The speed of the brush disc is centrifugal assisted, making pushing and washing easier. Thicken the water retaining strip to effectively prevent water splashing.

2

The cast aluminum integrated water absorption bar, with heavy arc design, has better water absorption effect. It can absorb water when turning 180 ° with the mold opening water absorption bracket.

3

Simple operation interface, one key operation, simple and convenient. Reset overload insurance, effectively protect the motor circuit.

4

Large capacity water tank design, open sewage tank cover and large opening design make it easier to clean the sewage tank. The sewage tank adopts water level floating ball technology to prevent water from entering the motor and protect the motor.

5

Front LED lights can work easily and efficiently even at night or in dim underground garages.

6

Maintenance free battery, no need to add liquid. Another option is lithium battery, which has a longer and more stable life. Intelligent microcomputer charger, stable and reliable.

This floor washer is a kind of equipment suitable for cleaning hard floors and simultaneously absorbing and recycling sewage. It has the advantages of environmental protection, energy conservation, high efficiency, silence, etc. It is widely used in hotels, parks, squares, factories, workshops, warehouses, shopping malls, supermarkets, stores, restaurants and other industries, and can be used to clean the hard surfaces such as ceramic tile floors, stone floors, epoxy floors, emery floors, terrazzo floors, plastic floors, PVC floors, and cement floors.

# Folding floor scrubber type

## TX-30B Scrubber Machine

### 1. Technical Parameter:

| Specifications   | Unit         |
|--|--------------|
| Cleaning Width (mm) Brush plate diameter Cleaning efficiency(m2/h) | 350 350 1350 |
| width(mm)  | Continuous   |
| operation time(h)  | Brush        |
| pressure(kg)   | Clean Water  |
| Tank Capacity (L) Sewage   | 20           |
| Tank capacity (L) Brush motor                                      | 25           |
| Vacuum Suction(mbar)   | 24v 400w     |
| Battery(V)   | 200          |
| Machine Length (mm)  | 24*35Ah      |
| Machine Width(mm) height(mm)                                       | Machine 900  |
| weight(kg)   | 580          |
|  | 700          |
|  | 58           |

## **2. Product Features**

- (1) Chaowei maintenance-free battery as the power, the battery does not need to add water, no post-maintenance, low-carbon and environmental protection.
- (2) Adopting original imported fan AMETK (AMETK) water-absorbing motor, with low noise and stable performance.
- (3) Washing and brushing, suction and drying integrated design, the ground is dry after use, absolutely no water stains.
- (4) Intelligent charging, automatic protection after a full charge, avoiding the old charger charging for a long time will burn the battery phenomenon.
- (5) Small size of the product, beautiful appearance, enhance the image of the company.
- (6) Small turning radius, simple operation and easy maintenance.
- (7) High working efficiency, mechanized operation, can clean 1350 square meters per hour.
- (8) Good cleaning effect, with its own sewage recovery tank, sewage, grit, automatically sucked into the sewage tank.

| Battery Capacity (Ah)                   | 40Ah*2      |
| Brush Disc Motor Power (W)              | 380         |
| Suction Motor Power (W)                 | 500         |
| Cleaning Width (mm)                     | 400         |
| Suction Baffle Width (mm)               | 580         |
| Clean Water Tank Capacity (L)           | 25          |
| Sewage Tank capacity (L)                | 30          |
| Cleaning Efficiency (m <sup>2</sup> /h) | 1600        |
| Working Hours (h)                       | 2-2.5       |
| Brush plate speed (rpm)                 | 180         |
| Total Size (mm)                         | 880*580*680 |
| Total Weight (KG)                       | 76          |

## Small hand-push folding type TX-D35 Scrubber Machine

### 2. Product Features :

**1**

**Floating brush plate design, self-sensing adjustment of brush plate pressure on the ground, cleaning more thoroughly; brush plate speed centrifugal assistance, pushing and washing more easily. Rotational plastic brush plate cover, effectively prevent splashing water.**

**2**

**Standard with PU acid-and alkali-resistant oil-absorbent rubber strips; with hair skirt instead of the traditional rubber skirt, longer service life.**

**3**

**Simple operation interface, washing and suction integrated folding handrail, strong and durable; 180 ° adjustable handrail, convenient for transportation and use.**

**4**

**Original imported brush motor, stable performance; double-layer suction motor, strong suction power.**

**5**

**Large water injection port for fast water injection; removable overall sewage Tank cover, easy to clean the sewage tank.**

**6**

**Lead-acid maintenance-free battery, to protect the continuous working hours. The machine comes standard with a built-in charger, drop-proof put into the water.**

This scrubber is a kind of equipment which is suitable for cleaning hard ground while sucking dry and recycling sewage, with the advantages of environmental protection, energy saving, high efficiency and silence. Widely used in hotels, schools, shopping malls, supermarkets, hospitals, office premises, parking lots, ports, outlets catering and other industries, can be used to clean tile floors, stone floors, epoxy floors, macadam floors, terrazzo floors, plastic floors, PVC floors, cement floors and other hard ground oil dirt dirt dust cleaning. Small miniature style, suitable for mobile work around the equipment in small restaurants office buildings machinery factory.

## ACCESSORIES DISPLAY

HEPA filter

50 caliber anti-static hose

50 caliber vacuum cleaner

plastic nozzle

Multi-fold star filter

50 caliber flat

50 caliber round brush

50 caliber S tube

### Detailed introduction:

- Dust suction fan: adopts turbo fan, which can work for a long time and run smoothly;
- Noise reduction technology: A stainless steel silencer is installed at the air outlet of the motor, which can effectively reduce noise;
- Pressure relief valve: When the filter screen or the suction port is blocked, it will automatically open to compensate the intake air and protect the motor;
- Filter: The filter element is made of polyester fiber, with a filter area of 32000cm<sup>2</sup>. With the star filter, it is checked layer by layer to filter fine dust and release clean air;
- Product material: The barrel body is made of stainless steel metal material, which has strong bearing capacity and can adapt to different working conditions;
- Dust collection bucket: 100L capacity drop-down dust collection bucket, dumping waste quickly and conveniently;
- Manual dust vibration: The machine is equipped with a manual dust vibration device, and the internal filter can be cleaned easily by shaking it outside the machine, which is convenient and quick;
- Cyclone separator: Using physical principles, the larger particles are filtered out at the first time without contact with the filter, which prolongs the service life of the filter.
- Places of use: factory workshops, food processing, machinery manufacturing, metal processing and other places, matching with production lines or production equipment.
- Absorbable substances: ground dust, dust, particles, liquids, wet solid substances.

### Detailed introduction:

- Vacuum cleaning motor: equipped with 3 motors, the power can reach 3600W, and it can be used for both dust suction and water suction;
- Control switch: Independently control the waterproof switch, one-button start operation is simple, and the suction power can be adjusted;
- Filter: Non-woven star-shaped filter device, with a total filter area of 26800cm<sup>2</sup>, can be washed and dried for repeated use;
- Product material: The barrel body is made of stainless steel metal material, which has strong bearing capacity and can adapt to different working conditions;
- Dust collection bucket: 80L capacity rear-turning dust collection bucket, dumping waste quickly and conveniently;
- Hand-pulled back blowing: By pulling the handle of the machine head back and forth, the air flow is changed, and the filter is blown back to achieve the purpose of cleaning the filter.
- Places of use: factories, warehouses, food, hotels, sanitation, property, cleaning, etc.
- Absorbable substances: ceramic powder, plastic spray powder, toner cartridge powder, metal powder and other similar fine powders. At the same time, it can clean metal shavings, sand, wood chips and a lot of dust.

#### Detailed introduction:

Industrial vacuum cleaner details...

- Vacuum suction motor: WX-3610 series device has 3 motors, the power can reach 3600W, and it can be used for both dust suction and water suction;
- Control switch: Independently control the waterproof switch, one-button start operation is simple, and the suction can be adjusted;
- Filter: Non-woven star-shaped filter device is adopted, with a total filter area of 26800cm<sup>2</sup>, which can be washed and dried for repeated use;
- Product material: The barrel body is made of stainless steel metal material, which has strong bearing capacity and can adapt to different working conditions;
- Dust collection bucket: 100L capacity drop-down dust collection bucket, dumping waste quickly and conveniently;
- Hand-pulled back blowing: By pulling the handle of the machine head back and forth, the air flow is changed, and the filter is blown back to achieve the purpose of cleaning the filter;
- Cyclone separator: Using physical principles, the larger particles are filtered out at the first time without contact with the filter, which prolongs the service life of the filter.
- Places of use: factory workshops, food processing, machinery manufacturing, metal processing, etc.
- Absorbable matter: ground dust, dust, particles, liquid, wet solid matter.

#### Detailed introduction:

- Dust suction fan: adopts turbo fan, which can work for a long time and run smoothly;
- Noise reduction technology: A stainless steel silencer is installed at the air outlet of the motor, which can effectively reduce noise;
- Control switch: Delixi control system, with overheat, overload, phase loss protection functions;
- Pressure relief valve: When the filter screen or the suction port is blocked, it will automatically open to compensate for the intake air and protect the motor;
- Filter: The filter element is made of polyester fiber, with a filter area of 28800cm<sup>2</sup>. It cooperates with non-woven fabric filter dust filter, and checks layer by layer to filter fine dust and release clean air;
- Product material: The whole machine is made of stainless steel, which has strong bearing capacity and can adapt to different working conditions;
- Dust collection bucket: SOL industrial capacity, side-turning dust collection bucket, dumping waste quickly and conveniently;
- Supporting use: It can be linked with other devices and work synchronously.
- Places of use: heavy industry, small factory workshop, etc., can be matched with production equipment.
- Absorbables: Metal shavings, grinding dust, slag and other heavy wastes.

**Detailed introduction:**

- Dust suction fan: adopts turbo fan, which can work for a long time and run smoothly;
- Control switch: separate switch panel, one key to cut off the motor power;
- Reverse air path design: double-layer barrel wall with uniform air holes inside, the machine adopts reverse air path design, which can effectively compress the sucked materials and prevent clogging;
- Filter: The filter element is made of polyester fiber, and the filter area is 38800 cm<sup>2</sup>;
- Dust collection bucket: 120L large-capacity dust collection bucket, high collection efficiency, with nylon collection bag, easy to clean;
- Supporting use: It can be used in conjunction with other equipment to achieve vacuuming while working and improve product quality.
